

Resizing Photos for Printing and Web Use

Once adjustments and resizing are done, save the image under a new name or numbered version.

- Pixel Dimensions**
- important for web use
 - set to suit monitor pixels
 - when you set one, the other changes to keep image shape

- Resolution**
- set to 72 ppi for web use
 - set to 300 ppi for printing

- Resampling and Proportions**
- ticks allow changes to number of pixels in image
 - leave ticked normally

- Physical Dimensions**
- important for printing
 - set to print size wanted
 - when you set one, the other changes to keep image shape

*This box is from Photoshop Elements.
It will look similar, though different, in other software*
